

Wellesbourne Stratford-upon-Avon

Designed by Ring Rose & England, the beautifully laid sawn Blackwell Buff sandstone slabs, steps and copings and clay block edgings, complement the historical attributes of this country residence and indeed the whole of the surrounding area in the heart of the Warwickshire countryside.

The material was laid in calibrated course widths and random lengths with a blue clay block edging and fixed using a semi-dry mix of sand and cement at a ratio of 3:1.

Cuts were utilised for copings and step detail in order to minimise waste.

Great Houghlands

Wigan

A transformed area of paving by PDG Stonecraft at a property in Billinge near Wigan. The scheme utilised materials which were available from stock and also materials ordered bespoke. Magma granite setts were used in the driveway and as a paving edge specifically to edge large planters which were set in the garden.

Magma granite slabs were used to pave the main hard landscaped area of the scheme. Egerton Red sandstone was used as a pathway and step into the property.

unlimited hard landscaping materials in stock

Stockscape understand that the needs of the commercial landscape contractor, professional garden designer and domestic end-user may be uniquely different but equally as important when it comes to supply, selection and service.

Stockscape can supply a wide variety of hard landscaping materials in various sizes, thickness and finishes and can offer a bespoke service for special items such as on-site sawing which can cut existing stock or take your own free issue material and cut to the size you require giving you maximum flexibility for you to choose the right material for your project.

A diverse range of hard landscaping enhancements including water features, granite and sandstone spheres, feature boulders, balustrading, planters and monoliths are also available from Stockscape to add that finishing touch to your prestigious scheme.

Stockscape offer a range of diverse materials ensuring that exciting new products meet UK technical levels and expectations of installed performance.

To meet the logistic challenge of delivering products on time and to the right quality Stockscape also operate a dedicated storage and distribution facility centrally located in the UK.

To fully appreciate how Stockscape can fulfil your requirements you may wish to visit our Bolton showroom or our storage and warehouse facility near Stratford-Upon-Avon where sample test panels of paving material are showcased.

Call 0845 050 5592 to establish which materials we currently have available in stock, advice on sourcing any unique materials and to discuss options on product-types that may be complementary to your scheme or design.

Porphyry

Prima Porphyry carries a 5 year guarantee against the action of frost, has excellent durability and resists high transverse breaking loads qualifying the material for superior pavement design and trafficked areas.

Branded as 'PRIMA' porphyry, the riven products retain all the nuances and historical values of the original natural stone.

Limestone

Like granite, quality limestone is used in a wide range of interior and exterior building applications such as paving, interior flooring and cladding, offering a harmonious, seamless appearance to any prestigious domestic scheme.

Reclaimed

Quality means everything to Stockscape and we recommend that all reclaimed paving materials be thoroughly vetted by the consumer before purchase.

Our strictness in quality control helps to ensure that none of the materials are rejected on site thus enhancing overall customer satisfaction.

Clay

Available in a range of sizes, colours and textures, clay pavers are superior in many respects and retain the longevity of the original design vision.

Clay has exceptional resistance to moisture and attack by acids and alkalis, all of which could affect the colour in alternative concrete products.

Granite

Granite paving is available in a wide variety of colours and textures and suitable for almost any kind of external and internal application.

Geologically it is a grained igneous rock containing a blend of accessory minerals that contribute to giving it uniqueness in colour.

Granite colours from dark to light with many shades in between can be sourced and supplied for your prestigious scheme.

Sandstone

Traditionally used for paving for over two centuries, sandstone is the geological term that covers the well known and much specified Yorkstone.

Sandstone has become increasingly popular over the last few years due to its innate ability to remain natural and steadfast.

Features. Specials. Bespoke.

A diverse range of hard landscape enhancements to add that finishing touch to your prestigious scheme.

Finishing touches

In addition to specific product-types, Stockscape can supply accessories including kerbs, channels, steps, copings, corduroy tactsiles and bespoke benches. Also granite worktops and hard landscaping enhancements such as water features, granite and sandstone spheres, feature boulders, balustrading, planters and monoliths.

Stockscape have also developed a unique process for the customised engraving of text, logos and graphics into most granite and sandstone tile surfaces, affording the highest quality finish and definition.

A specialist cutting service for bespoke sizes, made to order, is also available upon request.
